A truly excellent game for its time, and still quite entertaining even today. Lords of the Realm 2 is a game that revolves around attempting to take over a region, which is split into a number of counties. Each county provides your effort with resources such as food, lumber, money, and men.

The computer AI is remarkably good considering the age of the game. It can accomplish many intelligent context based tasks. For example if the computer sees it does not have the manpower to hold an endangered county, it will wreck what it can and transport away all the resources so that they do not fall into enemy hands. In combat (which is done RTS style) it can organize a cohesive attack when it has the advantage of numbers, or attempt to turtle behind cover when it is at a disadvantage. The computer can organize small expendable raiding parties designed to burn your crop fields and cripple your economy, and knows to press the advantage if it spots a lightly defended territory. Overall it cannot match a human player, but it greatly lowers the need for computer advantages still used today by many games to artificially inflate difficulty.

Computer controlled Lords have personalities and voice actors assigned to them for flavor, and although the voice acting is generally terrible, I must admit that it makes the game more enjoyable to have The Knight insult me in his exaggeratedly arrogant tone, or The Baron politely inform me of his intent to annex my territory.

The UI is easy to understand, and a marked step up from LotR 1. There are tooltips and help topics; a brand new player will have no trouble diving right. There are even auto saves, which was not a given at the time! Very convenient!

LotR 2 is fast and fun, a truly great game for its time. If you never played it, and are a fan of strategy, it's certainly worth a look!. The driver booster software does find even pretty exotic drivers and installs them correctly. but after reinstalling Windows to the exact same machine. Driver Booster 5 Pro Lifetime does decline activation for this "new" pc.

UPDATE:

After being contacted by the developer of this software, my problem was solved. But after all I believe that binding the activation to the steam account would be more useful. Most of the time I need to install drivers when I resetup my machine with installing windows fresh. The only drivers that really needed to be updated frequently, are the graphics drivers for gaming. And the only two manufacturers of graphics boards with real gaming capabilities do provide an autoupdate feature in their driver suites.. Seriously? I thought I had exclusive items for preordering, and now i can buy it for 1\$?. Interesting premise and basic repetitive gameplay, a relaxing journey as a trading caravan in arabian night desert filled with ghouls and jackals wanting to eat your face. But there are some nagging minor UI, game design, and writing problems that keep it in the back of your mind as "decent" instead of "good" game.. The game was a bit too short. I beat in about 2-3 hours so its not really worth the value time wise but the writing was pretty good. Without the soundtrack and the humor the game would be total garbage. The gameplay was horrible and there was really only one type of enemy which got really repetitive...really fast. Overall this is one of games that you buy in an indie bundle that you only finish because you want to see the ending and have a quick chuckle. I am a big indie gamer but this one just wasn't that great. If I had to give it a star rating I would probably give it a 4/10 stars. This is game is definitely not worth 5 dollars but if its on sale or in a bundle you should check it out.

- SkyBorg :). Good game why are you reading bad reviews?. Good time-waster game filled with old memes. love the hero

A awesome game that i really enjoyed playing when it was playable. The game is pretty much dead. My sugestion would be make the game free so everyone could play. but besides that fact its an awesome game that i enjoy and wish to play again (with a full lobby). As I am a huge fan of dungeon crawlers, I went into this expecting something like Legends of Grimrock (which I loved, and its sequel). This however was... disappointing.

Everything this does, LoG does better. The classes are your basic warrior, berserker, priest, mage, etc. You have 4 people you go through dungeons with, detecting secrets, traps, fighting, getting loot.

Don't expect to use any strategy in this game. If you even back up from an enemy approaching you to reposition yourself to not get hit, you are considered "fleeing" and get a percentage hit to all your health. As if that wasn't bad enough, if you're in a small 9x9 room with two enemies coming out of the walls, and try to lure them to get into one of the opened spots to take on one at a time, not only do you get the Flee debuff, but you could have an entire open square and the game WON'T LET YOU MOVE because the enemy turns and is in the process of moving to block you and the game allows it. The fountains you find aren't health, they're 'resurrection' but the game never tells you this. You just drink them and then wonder why nothing happened.

The enemies are pretty generic, and the graphics aren't that great. You can't even use an entire spellbook. Your mage has one slot for one spell and another slot for either a spell or a weapon. So if you're trying to swap out if you run out of mana (oh you'll run out of mana all the time and there are limited potions for anything), you'll keep getting smacked while you're fumbling in your inventory screen. The bonuses you get on levelling up are unmeasurable for gameplay and honestly, this is just a disappointing offering. I've never requested a Steam refund but I really think I might and try something else on sale.

If you're looking for a good dungeon crawler, this game just punishes you for playing it. Avoid..

1 - ) Open Idle Master.

2 - ) Drop cards.

3 - ) Sell them.. This game is great. The only thing that frustrates me is that I probably missed some references. However, I found Judge Dredd, Agents of S.H.I.E.L.D, Monkey Island, Fallout, Horizon: Zero Dawn, and around thirty other references?. This is very much a first-impression review. The game just couldn't get me interested for longer.

It's a slow-paced and rather boring puzzle game, gating a slow-paced and rather boring storyline.

I am also not a fan of some of the art design. The pond, where you'll spend most of your time, just isn't easy on the eyes. Nor are the kimono with shifting patterns that many characters wear.. 9/10 friggin love this game
